

Social Value & Sustainability

The importance of contributing to our community

Q3 2022 Update

Making a positive impact

“Bayanix is a business that has a strong sense of taking care of one another.”

This overflows into the areas we are working in. We look to see what we can do to help the local communities and leave an area a little better than when we arrived

We make contributions to charities, not just by donating funds, although we do that too. But we also donate practical help and time.

Support for Charities

Over the last few years, Bayanix has supported charities to help children improve their quality of life while undergoing treatment in hospital.

NHS

Protecting NHS Frontline Staff

At the start of the Covid-19 pandemic, Bayanix donated supplies to help frontline NHS staff to be protected from the virus, including FFP3 masks, gloves and face fit testing kits.

Bayanix

Stepping into Construction

Bayanix teamed up with Youthbuild to provide the students with a week's experience of stepping into the world of construction on a live site. After a thorough induction into site life, the students were tasked with constructing drylined partition walls in the Great Hall and plastering walls in the lift lobbies, allowing them to put into practice the skills they had been learning off-site.

Bayanix then attended the Graduation ceremony and presented certificates to the students.

Fire Marshal Training

To further enhance the CVs and employability of the Youthbuild students, Bayanix provided a half-day Fire Marshal course, comprising of theory and an exam, combined with practical extinguisher familiarisation work.

Each student emerged from the course as a qualified Fire Marshal, to help them with their onward careers on site.

YB YOUTH BUILD

Giving local enterprises a helping hand

As part of the social value work Bayanix carried out in Thamesmead, we were delighted to be able to assist local enterprises CC Events and Wasteless Markets in the work they do for the local communities and environment.

This includes diverting waste from incineration and raising money for charity.

Bringing classmates together

Bayanix teamed up with Peabody Housing Trust to make sure that all the children in a primary school class were able to go on their PGL activity trip.

Four children were unable to go, due to affordability of the trip. Peabody stepped in and brought this to our attention and asked if we could help. We were, of course, happy to fund the four children, so they could join their friends.

If we can help make a small difference to children living in poverty, we are glad to have been able to help.

Greenwich & Bexley
Community Hospice

Event Support

Bayanix has been helping Greenwich & Bexley Community Hospice throughout 2021 / 2022 with fundraising events by providing logistical support.

The events raise much needed funds for end-of-life care, to help ease the suffering of patients and their loved ones.

Charity Golf Day

The Bayanix team took part in Peabody's 2022 Charity Golf Day, on Friday 22nd April at Foxhills Country Club.

The event was in support of the Peabody Community Foundation, which tackles issues such as food poverty in local communities.

A grand total of £68,707.77 was raised for these community programmes.

Careers Carousel

Peabody organised a careers carousel morning for local students, taking place at The Moorings Sociable Club in Thamesmead, which was newly refurbished by Bayanix.

Bayanix was invited to come along and speak to the students (Years 10-12) about the varied careers in construction, how to get into a construction career and the personal journeys of the team taking part.

Trees for Life

In order to make even a small impact on reducing our carbon footprint, Bayanix has donated to Trees for Life to have a grove in the Caledonian Forest of Scotland, which we can add our trees to through company / staff / associate donations.

By removing CO2 from the atmosphere and locking it up, trees help to combat climate change. Recent studies have found that trees may be the best way to stabilise our climate.

Seedlings are collected up from the existing trees and planted on open hillsides to create healthy young woodlands and restore the forest.

This rich habitat supports wildlife, such as the red squirrel, black grouse, pine marten and golden eagle.
